

Dynamics 365 Finance and Operations

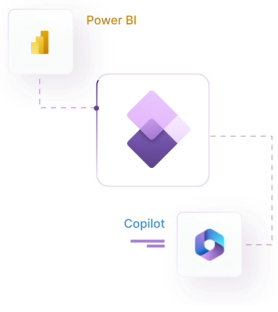

Automate Core Financial Processes

Streamline entire inventory, and get 100% visibility throughout the supply chain processes with Microsoft Dynamics 365 Finance and Operations.

Let's Get Started!

Consult Now!

What is Dynamics 365 Finance and Operations?

Microsoft Dynamics 365 for Finance and Operations is a powerful ERP solution for complex and diversified businesses to manage financial and supply chain operations. With the sheer capabilities of AI, BI, and automation, it lets businesses manage global operations while pushing growth towards scalability.

D365 F&O enables you to make:

- ✓ Smart decisions with real-time data
- ✓ Simplify business operations with advanced tools
- ✓ Adapt to changing customer demands using cloud capabilities

With a centralized communication bridge between the business and users, it pushes the business towards maximized ROI and productivity.

Note: Dynamics 365 F&O was earlier known as **Dynamics AX** (Axapta) and specifically designed as on-premises ERP solution. With the modernization of business solutions, Microsoft upgraded Dynamics AX to Dynamics F&O to cater more advanced tools and capabilities for modern businesses.

Simplify Financial Operations

Track, manage, and control all financial operations, regardless of business complexity. Along with streamlining finance, you can focus on managing accounts while gathering all the information in real-time.

D365 Finance and Operations comes with an interactive user experience to help you utilize all tools and capabilities without any hassle.

- ✓ Build enhanced expense management reports
- ✓ Follow different regulatory compliances
- ✓ Automate settlements in the general ledger

Track Inventory on the Go

Inventory management is an essential part of the entire business, and you can do it seamlessly with Dynamics 365 for Finance and Operations ERP solution. It empowers you to make strategies for replenishment orders, optimize surplus inventory, track orders, and perform inventory forecasting.

The inventory module of Dynamics 365 F&O will enable you:

- ✓ Get real-time feedback on different processes
- ✓ Allocate resources whenever needed for optimum performance
- ✓ Multi-currency support for international markets

Plug and Play Integrations

D365 Finance and Operations is a flexible solution when it comes to integrating native Microsoft solutions. By integrating different add-ons and solutions, you will be able to enhance the performance of the entire solution. And the best part about the **Microsoft Dynamics 365 ecosystem** is that you can integrate any solution with just a click.

Even when the job of the add-on is done, you can disintegrate it without losing any data. That's how the connection between native Microsoft solutions works, and you can establish the connection by yourself without relying on your **Dynamics 365 support partner**.

Supports Globalization

Dynamics 365 Finance and Operations supports 27 countries and 42 languages so that you can expand your business beyond global boundaries. Microsoft knows the fact that a country's compliances and regulations change with time; that's why it continuously releases updates to support your ongoing business.

Dynamics 365 for Finance & Operations offers features such as:

- ✓ Electronic reporting
- ✓ Global tax acceptance
- ✓ Automated electronic invoicing

Microsoft Dynamics 365 Finance and Operations Features: Perfect Tools for Unique Businesses

Dynamics 365 F&O comes with a variety of tools and functionalities to streamline different departments of a business. Some of the capabilities are:

Finance Management	<ul style="list-style-type: none"> ✓ General Ledger Manage, track, and record all financial transactions, and prepare detailed financial reports. 	<ul style="list-style-type: none"> ✓ Budget Planning Optimize and manage budgets while calculating credit or debit funds in real-time.
Manufacturing

Field Service	<ul style="list-style-type: none"> ✓ Revenue Recognition Calculate and distribute revenue for multi-element products or services with ease. 	<ul style="list-style-type: none"> ✓ Expense Management Manage and track all expenses for a business while generating precise reports for revenue analysis.

Dynamics 365 for Finance & Operations Benefits: Strengthen Your Business with Advanced Tech

Microsoft Dynamics 365 Finance and Operations comes with numerous benefits that support the business as it grows and expands to greater heights.

Built-In Analytics

Cloud deployment enables the business to avail of real-time analytics for a streamlined decision-making process. Such data insights will help you make informed decisions with 100% visibility across different processes.

Interactive User Experience

Microsoft offers interactive and similar kinds of user experiences with all its business solutions. This similarity of different applications empowers the user to operate a solution in a better way from the first point of contact.

Easy to Scale

With increasing customer demands, you can easily increase the ERP's performance by upgrading its hardware and capabilities within minutes. Also, there would not be any need to invest huge amounts of money to scale your system.

Avail Automation

Automation lets you enhance the efficiency and productivity of users by automating most of the manual and recurring processes. Also, sharing data from one department to another can be seamlessly performed by D365 F&O.

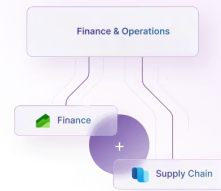

Microsoft Dynamics 365 for Finance and Operations: Latest Update 2024

Businesses have to implement the D365 F&O as a whole irrespective of their specific requirements. It leads to a complex, time-consuming, and costly implementation. Microsoft understood this concern of different businesses and separated the whole solution into two powerful business applications:

- ✓ Microsoft Dynamics 365 Finance
- ✓ Microsoft Dynamics 365 Supply Chain Management

However, most businesses, decision-makers, and consultants consider this a single solution: Microsoft Dynamics 365 Finance and Operations.

All capabilities and tools of D365 F&O have been divided into these two solutions so that businesses can go with the desired set of capabilities they require to grow their business. Also, it has become way more cost-effective and comes with a variety of licensing options.

Switch to Microsoft Dynamics 365 Finance and Operations

Avail Automation and Eliminate Complexity

Revolutionize your business to withstand changing market demands and grow even in the toughest situations with Dynamics 365 for Finance and Operations.

D365 Finance and Operations Licensing

With the release of Dynamics 365 Finance and Dynamics 365 Supply Chain Management, Microsoft has stopped offering any licensing options for D365 Finance and Operations. If you still want this solution, you must separately purchase licenses for both.

However, you will be required to purchase at least 20 licenses to use any of the solutions.

Dynamics 365 Finance is available in 4 licensing options:

Dynamics 365 Supply Chain is available in 3 licensing:

Dynamics 365 Finance and Supply Chain Management Pricing
